

# Acronis® Disk Director® 11 Home

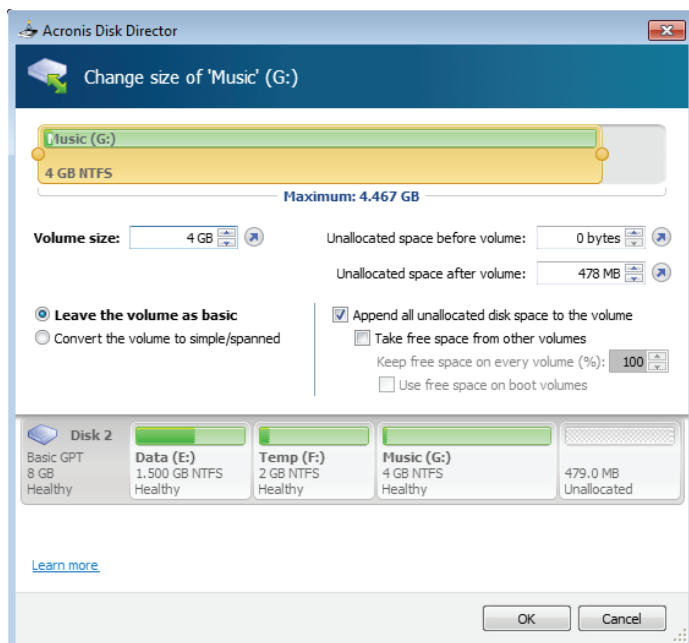

The safest way to manage your hard disk drives for better performance and data protection

Get the ultimate Disk Management Solution with Acronis® Disk Director® 11 Home. It's never been easier to create hard disk partitions, resize, move or merge partitions without data loss. Optimized to offer the maximum of freedom without impacting your current system!

With its superior power, flexibility and ease-of-use, Acronis Disk Director 11 Home is the right choice for anyone who needs to perform advanced operations over disk layouts in order to get the most out of their PC.

Moreover, Acronis Disk Director 11 Home is an ideal companion product to Acronis® True Image Home. Together the products provide you with comprehensive partition management and system protection. You can create two partitions on your system, one for data and one for applications, using Acronis Disk Director 11 Home. Then, you can backup your data partition on a regular schedule using Acronis True Image Home, ensuring that you capture changes to your data. You can also backup your system partition whenever you install new applications or apply new patches.

Resize, move, copy, split and merge volumes without data loss or destruction.

## Key Features

**New!** Full Windows 7 Support

Resize volumes

Split volumes

Merge volumes

Create, convert, copy and move volumes

**New!** Dynamic Disk support\*

Install multiple operating systems on one PC

**New!** GPT disk support

**New!** Add or break mirrored volumes\*

**New!** Span volume across multiple physical disks

**New!** Convert basic disk to dynamic and vice versa

**New!** Convert MBR disk to GPT and vice versa

Boot from CD/DVD or USB stick

**New!** Clone disk to a replacement HDD

Recover lost or deleted partitions

(\* for supported operating systems)

Feature	Description
<b>New!</b> Manage all your disks and volumes with extreme flexibility	Carry out a vast array of disk and volume management operations: <ul style="list-style-type: none"> <li>• Resize, move, copy, split and merge volumes without data loss or destruction</li> <li>• Format and label volumes, assign volume letters, and set volumes active</li> </ul>
<b>New!</b> Dynamic Disk support*	Dynamic Disks provide greater functionality - volumes can be spread over several disks
Install multiple operating systems on one PC	Try new operating systems without impacting your current system with Acronis OS Selector
<b>New!</b> GPT disk support	Use Acronis Disk Director 11 Home with GPT disks to create volumes over 2TB and get additional disk reliability against possible data damage
<b>New!</b> Add, remove, or break mirrored volumes*	Make your basic or simple volume fault-tolerant in just one action by adding a mirror. If you need extra unallocated space on a disk containing one of the mirrors, remove a mirror
<b>New!</b> Span volume across multiple physical disks	Optimize your system by combining free space on different hard disk drives and get larger volumes
Ease-of-Use	User friendly interface and wizards guide you in order to get the most out of your PC
<b>New!</b> Convert basic disks to Dynamic Disks seamlessly and vice versa	Convert the existing basic disks to Dynamic Disks to achieve additional disk reliability for data storage
<b>New!</b> Convert MBR disks to GPT and vice versa	Why would you need to convert an MBR disk to a GPT basic disk? <ul style="list-style-type: none"> <li>• If you need to make a volume whose size is over 2 TB</li> <li>• If you need more than four primary volumes on one disk</li> </ul>
Boot from CD/DVD or USB stick	Boot your PC from a CD or USB stick and manage all your volumes
<b>New!</b> Clone Disks to a replacement HDD	The Disk Cloning wizard lets you replace the old basic MBR disk with a new one without reinstalling operating systems and applications
Recover lost or deleted partitions	Acronis® Recovery Expert helps you to recover accidentally lost or deleted volumes on basic MBR disks

\* For the operating systems that support such functionality

## Hardware Requirements

Item	Minimum Requirements	Recommended
Boot firmware	Bios-based**	
Computer processor	Modern processor, 800Mhz or faster	1Ghz 32-bit (x86) or 64-bit (x64) processor
System memory	256MB	512MB or more
Screen resolution	800x600 pixels	1024x768 or higher
Installation disk space	150MB	
Other Hardware	Mouse	CD / DVD recording drive, or a flash drive for bootable media creation

\*\* Machines that are based on Extensible Firmware Interface (EFI) are not supported

## System Requirements

- Windows 7 (all editions)
- Windows Vista (all editions)
- Windows XP (all editions)
- 512MB RAM
- CD-RW/DVD-RW drive for creating bootable media

## Supported File Systems

- FAT16
- FAT32
- NTFS
- Ext2
- Ext3
- ReiserFS3
- Linux SWAP
